Other Fees	Additional charges of the platform for provision of other services.

4. Our Advantages

4.1 Ability to Operate in the Global Market, 4.2 Great Technical Foresight, 4.3 Efficient Resource Integration Competence...

5. Governance Mechanisms

The Crypto Pulse team will set up a Crypto Pulse Foundation ('Foundation' for short) in an offshore jurisdiction to devote itself to the development, construction, promotion, and financial support of the project, facilitating the healthy development of the ecosystem in that community.

Containing operational procedures and rules for daily work and special cases, the governance framework of the Foundation will consist of the following functional committees:

5.1 Decision-Making Committee

The Foundation sets up a decision-making committee to appoint or dismiss executive director and heads of functional committees, make important decisions, hold emergency meetings, and so on. Members of the decision-making committee and president of the Foundation have two-year tenures.

Any of the following matters shall be voted by the decision-making committee through open vote, with each member holding one vote and the president holding two. The decision reached by the decision-making committee shall be voted for by majority of all the committee members in office:

- Modify the governance framework of the Foundation;
- Appoint and dismiss executive director and heads of functional committees;
- Make key decisions;
- Appoint and dismiss members of the decision-making committee during their tenure in such cases as violation of members against limits of authority, laws, and administrative regulations, or voluntary resignations;
- Considered necessary by president of the Foundation;
- Jointly proposed by more than one-third of decision-making committee members;
- Proposed by executive director;

Decision-making committee meetings should be attended by committee members personally. A member unable to attend for any reason may entrust other members of the committee to attend in writing and, if not, he shall be deemed to have waived his voting right at this meeting.

5.2 Executive Director

An executive director is elected by the decision-making committee and is responsible for the daily operation and management of the Foundation, the cooperation and coordination among subordinate committees, and hosting meetings of the decision-making committee among others. This person shall report work to the decision-making committee regularly.

5.3 Finance and Human Resources Committee

The finance and human resources committee is responsible for the use and audit of funds raised by the project, management of developers' compensations, audit of daily operating expenses, and so forth.

5.4 Market and Public Relations Committee

The Market and public relations committee will serve the community, conduct project promotion and publicity, and so forth. In addition, the committee is also responsible for managing external public announcements. In the case of an event harming the reputation of the Foundation, the committee shall be fully in charge of the public relations and company responses—after internal audits and assessments have been completed.

6. Risk Warning and Disclaimers

This paper is only informative, rather than giving advice on transactions pertaining to equity in Crypto Pulse or its securities. Any proposals or inquiries of a similar nature will be made under credible terms and permitted by applicable securities legislation and other relevant rules. Moreover, the foregoing information and analyses do not constitute a suggested course of action for investment decisions.

This paper does not constitute any investment advice about any securities form, investment intention, or instigation of investment.

This paper neither constitutes nor is understood as an offer of any transaction, any behaviour to invite any transactions for securities in any form, or any contract or commitment in any form.

Crypto Pulse makes it clear that relevant interested users have clearly understood the risks of Crypto Pulse and that, once participants get involved in the project, it means that they are aware of and have accepted the associated risks of the project and are thus willing to experience any and all corresponding results or consequences.

Crypto Pulse expressly disclaims any liability whatsoever for any direct or indirect losses arising from the participation in the project of Crypto Pulse, which includes:

- Economic losses caused due to users' transactions;
- Any error, negligence or inaccurate information due to individual understandings;
- Losses resulting from individuals' transactions of various blockchain assets and any resulting behaviours.

7. Conclusion

Coinbase Statement

Crypto Pulse supports a broad, balanced, and fact-based dialogue on cryptocurrency to form the basis of a regulatory framework that promotes responsible innovation.

We look forward to continuing to share our experience and expertise and being a part of future consultations.
